

Diagnostic Ultrasound System

NEW

DC-3Vet

DC-3Vet, a compact system with optimized flexibility, delivers excellent image quality with efficient work flow to accommodate a wide range of applications in different exam environment.

Integrated with professional veterinary software packages and exceptional ergonomic design, DC-3Vet provides versatile solutions with the greatest ease of use for veterinary ultrasound scanning.

Designed on the state-of-the-art digital architecture, DC-3Vet incorporates complete imaging modes, including 2D, M, PW, HPRF, Power/DirPower, Tissue Harmonic imaging, Trapezoid imaging, iScape™ View (panoramic imaging), and Smart3D™ (free hand 3D imaging), to satisfy the booming clinical requirements for reliable veterinary diagnosis.

DC-3Vet

Diagnostic Ultrasound System

Professional Design for Veterinary Use

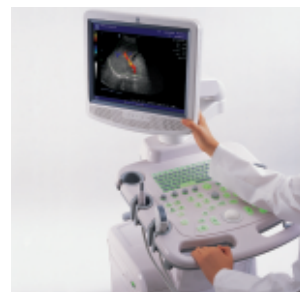

- Specially designed veterinary transducers
- Reproductive software packages for Dog, Cat, Equine, Bovine, and Ovine
- Powerful veterinary information management
- User-programmable Calculation & Measurement Function

Exceptional Ergonomics

- Compact system design with best mobility
- High definition LCD monitor & Omni-directional arm
- Swivel and height adjustable control panel
- Home-based key board layout with back-lit and task light
- Hand-fit transducer design with light and flexible cable

Intelligent Workflow

- Context-based soft keys: Easy parameter adjustment and measurement
- iTouch™: Quick image optimization for both 2D and PW images
- Q-click™: Click and adjust on-screen parameters directly
- Synchronous navigation: Manual-free operation
- Thumbnail: Easy review during live scanning
- Editable report with images embedded
- Off-line analysis, partial keyword search, easy conversion and export
- Image Storage and transfer: DVD-R/W, USB and optional DICOM3.0
